ION FIVE: NEWS MEDIA AND RESOURCES

SOME PHENOMENA OF DECISION MAKING UNDER STRESS

1. The greater the stress, the greater the conceptual rigidity of an individual.
2. The greater the conceptual rigidity the more closed to new information the individual becomes.
3. The greater the conceptual rigidity, the greater the tendency to repeat prior responses, to responses, to the exclusion of new alternatives.
4. The greater the stress, the less the ability of the individual to tolerate ambiguity in the environment.
5. Intolerance of ambiguity leads to a response to a stimulus before adequate information is available for the correct response.
6. Under increasing stress, there is a decrease in productive thought and an increase in non-productive thought.
7. The greater the stress, the greater the distortion in perception of the environment.
8. The greater the stress, the greater the amount of risk perceived in the environment.
9. The greater the amount of time spent on a task, the lower the amount of risk perceived in the environment.
10. In a crisis situation, decision makers have difficulty distinguishing between threats to themselves and threats to the organization.
11. The greater the fear, frustration, and hostility aroused by a crisis, the greater the tendency to aggression and escape behaviors.
12. In a crisis situation, negative psychological factors are reinforced.
13. In a stressful situation, the only goals that will be considered are those related to the immediate present, at the sacrifice of longer range considerations.
14. The greater the stress, the greater the tendency to make a premature choice of alternatives before adequate information is available for a correct response.
15. The greater the stress, the greater the likelihood that a decision maker will choose a risky alternative.
16. The greater the time pressure, the poorer or more incorrect the choice of alternatives becomes.
17. Groups experiencing substantive conflict more frequently employ creative alternatives than groups without conflict.
18. Groups experiencing conflict show more effective performance in decision making tasks than groups in little or no conflict.
19. The greater the group conflict aroused by a crisis, the greater the consensus once a decision is reached.
20. In crisis, the number of communications channels available to handle incoming information decreases.
21. In a conflict, there is greater need for effective leadership.
22. The smaller the group, the greater the amount of influence the leader will have.
23. The smaller the group, the greater the amount of consensus that will be achieved through group discussion.
24. The tendency to choose a risky alternative increases with continued participation in a decision making task.
25. The greater the reliance on group problem solving processes, the greater the consideration of alternatives.

SECTION FIVE: NEWS MEDIA RESOURCES

PREPARING TO HANDLE THE NEWS MEDIA DURING A CRISIS

Anne-Marie St. Germaine
Jasculcal/Terman and Associates
Chicago, Illinois

In today's education environment, officials and institutions find themselves on the firing line. The savvy school attorney knows that, more often than not, a crisis means a public relations challenge as well as a legal one. Since counsel is often the first called for help, you have an opportunity to set the stage for how the public and the news media react to the circumstances.

A crisis can take many forms in the school setting. Some – for example, gun violence, hostage situations, demonstrations, natural disasters, chemical contaminations – are “of the moment,” at the school, and a potential threat to lives or safety. Other kinds of crises include real or perceived financial wrongdoing, labor negotiations, and teachers' strikes:

One thing common to the above situations is that the damage inflicted on an organization's reputation is determined more often by its handling of a crisis than by the seriousness or outcome of the crisis itself.

While it's true that an essential vehicle for getting out your message is the news media, preparing to handle the news media is just one aspect of overall crisis communication. It's worth reviewing the “big picture” of crisis communication before getting into specifics of preparing to deal with the news media.

THE BEST PREPARATION - HAVE A PLAN.

Crises unfold quickly. Being prepared and ready to anticipate what you'll need to do will help you immeasurably if and when you face a crisis. A plan boosts your ability to manage the situation and minimize the damage with external audiences. Advance planning also enables you to make sure those within your school understand the tough issues you face and how they affect everyone concerned.

Another good reason for advance planning is that in case of a crisis, you will not waste any time debating process or basic facts or procedures when you should be “out front” managing your message and the issues at hand.

Managing the flow of information may be the single most important thing you do in a crisis. Having a plan in place helps you to do that.

Establish a Crisis Communications Team

The *team* should include appropriate school officials, legal counsel, external counsel where applicable, and selected representatives from constituencies as appropriate and desirable. For example, at times it may be prudent to include law enforcement, teachers, or others depending on the nature of the crisis. One person, if possible, should be designated as the spokesperson to deal with the news media.

Develop a Crisis Communications Plan

A *plan* outlines important steps that need to be taken by school officials immediately when a crisis hits – when information must be gathered and distributed quickly and accurately to all who need to know. The plan will minimize the risk of overlooking an important step in the first 24 hours after a crisis hits, when the time frame for making important decisions is a matter of minutes.

Conduct Crisis Media/Message Training Sessions for the Crisis Team

Crisis *training* is an essential component of advance planning. It helps you focus on core messages about the institution –in this case, the school –and builds the teamwork and rapid response mechanism needed should a crisis hit. Such training has two basic elements: what you’ll do when a crisis hits, and how you’ll explain what you’re doing to others.

Review and Update the Plan Periodically

A plan on a shelf does little good. Personnel, governance and operations may change, and an evolving public climate should be reflected in your plan.

CRISIS CHECKLIST: ACTION STEPS

Each crisis will be different; here are some basics for your crisis checklist.

- Assemble the core crisis team according to a predetermined notification list. Contact appropriate legal counsel. Contact appropriate agencies and insurers per. legal counsel.
- Notify families in person, if possible (where applicable).
- Address the needs of victims and their families (where applicable).
- Compile all required/available information to make decisions.
- Be ready to play central role, both on the crisis team and publicly as a leader.
- Contact administrative help.
- Notify employees/others.
- Consider counseling for victims, coworkers, families (where applicable).
- Notify appropriate public officials and community or interest groups.
- Draft a factual statement and distribute it to the full crisis team.
- Review who else needs the information, when, and in what sequence.

If the core crisis team determines that outreach should be made to the news media, this should be done as swiftly as possible. One person on the crisis team should coordinate contact with appropriate reporters and, where warranted, editorial boards to set up interviews or meetings.

MANAGING THE NEWS MEDIA

Before, during and after a crisis, public perception of your school will in part be shaped by the news media. It is essential that information shared by the spokesperson with the media is as up-to-date and complete as possible.

It's usually a good idea to respond to media inquiries as soon as possible. Delay in responding to media can create the perception that you have something to hide. Or, that you don't know what you're doing.

At the same time, do not rush to deny or accept responsibility. The initial information you have may be incomplete or wrong. Do your own investigating before reaching any conclusions. (In some cases, that could take days, weeks or months.) You do not have to have all the answers right away, despite the news media's aggressive quest for information.

It's best to keep the number of people and supporting materials to a minimum when meeting with members of the news media. The most effective approach is a clear and persuasive argument, backed up with easily understood facts.

Prepare a basic statement for the media. Make sure that it is reviewed by the core crisis team. Stick to the facts and don't speculate or theorize. Make sure your organization's concerns and compassion are reflected in the statement. A preliminary statement is fine; it can buy you valuable time. Determine what else you need (question and answer pieces, list of supporters, third-party quotations, background information, and so on).

As soon as you're ready:

- Contact all appropriate media. In most cases, it's best the news media hear from you first about what's happened.
- Provide news bulletins as the crisis evolves/ unfolds.
- Record the names of arriving reporters at the scene and represented media outlets.
- Provide information to all media outlets and record to whom what information is released.
- Receive phone calls from the news media.
- Determine whether an on-site news conference or briefing is necessary.

It is important to work *with*, rather than against, the new media (they are not the enemy!). This will help prevent the spread of misinformation, as well as demonstrate that school officials are concerned for the safety of students, employees and neighbors. You must assure the public that the school administration is taking all steps possible to remedy any crisis and keep people safe. The media can help you do that. Make it clear to the media that you are providing as much information as you can, as soon as possible. At the same time, of course, the school must balance the public's right to know with legal and privacy concerns.

Responding to Negative Stories

Should the news media run a negative story; an *immediate* response should be made in the form of a call to the reporter and/or letter to the editor. In some cases, it's appropriate for the response to come from the most senior official possible. In other cases, you may want to downplay the importance of the story and not have your top spokesperson respond. In any case, stick to the facts and your key messages when formulating your response.

Media Monitoring

Clipping services and radio and television monitoring services can be helpful, should the situation warrant.

THE ABC OF CRISIS COMMUNICATIONS

Here are a few tips for dealing with the news media that will serve you well in the crisis environment. Thinking about these in advance and making sure your crisis team does the same is good preparation in itself.

The As

- **Anticipation**

Before talking to the media, anticipate likely questions and have answers ready be aware of gaps in information, and know where you're most vulnerable to media scrutiny Know your history with individual media organizations or reporters.

- **Agenda**

Prepare an agenda of points *you* want to make during an interview Even though there is a tendency in a crisis situation to simply react to media questions, there are still messages you want to communicate about the situation and how you are handling it. Identify three or four major message points and make sure they are repeatedly stated during the interview.

- **Accessibility**

Be accessible to the news media. Many crisis situations call for having the most senior executives do the media interviews. This conveys that you are taking the crisis seriously. Respond to reporters as quickly as possible, even if only to field a question that you will have to research. You do not want the media to say school officials were unavailable for comment.

The Bs

- **Brevity**

Comments should be concise, informative and relative to the subject of the inquiry when you start to ramble and move from the subject of the question, you may stray into dangerous or off-point topics.

- **B.S.**

Do not "b.s." the media. You will damage your credibility if you come across as insincere, or even worse, arrogant. Do not gloss over or minimize problems. If you do not know the answer to a question, say so, and let the reporter know that you will do your best to find out the answer as quickly as possible. Also, avoid the phrase "no comment" when at all possible. In some cases, you may not be able to comment publicly, but try to find a better way to describe your inability to comment. Say something like, "We're still doing our own internal investigation and will have more to tell you later" or "Negotiations are at a very sensitive stage, and it could be harmful if we commented right now"

Take control of the situation quickly Assemble the core crisis team immediately and make it clear to the media that you are getting control of the situation as best you can –that you are not just "letting things happen."

- **Bad News**

Get out the bad news yourself — do it quickly, and get it over with and behind you. The worst thing you can do is prolong a crisis by stalling so that it drips out like a leaky faucet. Stalling or offering only fragments of the story will create an information gap. That gap will be filled by speculation, or even worse, by misleading or incorrect information from unfriendly sources. Frame the bad news in your own context. This allows you to explain what happened from your perspective. ‘Getting the bad news out quickly yourself will also win you points for candor and credibility? With the news media and general public.

The Cs

- **Consistency**

Consistency of message is always important, but it is critical in a crisis. Provide information that is as accurate and up-to-date as possible. Your credibility is already on the line because of the crisis; do not add to your problems by having to go back and correct misinformation. Keep information centralized and make sure the spokesperson is well-briefed by the crisis team before fielding questions.

- **Concern**

While you will understandably be concerned about the school’s reputation, your primary concern must be for the people affected by the crisis –the students and their families, the injured, teachers and other employees, whatever the case may be. That concern must come across in your communications with the news media. Do *not*, however, take responsibility for the crisis.

HANDLING UNEXPECTED MEDIA

It is important to be prepared for the media if they call or arrive at the school site. However, should media call or arrive unexpectedly, follow your communications plan to alleviate confusion and avoid the spread of misinformation.

Since schools do not necessarily have a centralized receptionist, it is extremely important that all employees be notified of the situation and instructed *not to answer any questions*, and to forward all media inquiries to a designated contact on the core crisis team and/or the designated spokesperson.

If media or others unexpectedly arrive at the school scene, these guidelines should be followed by the person at the site:

- Do not give out *any* information, no matter how “harmless” it may seem.
- Politely tell the reporter that because of safety measures (or whatever is credible and appropriate to the situation), he/she should wait outside while someone is located to help him/her.
- Another employee should make sure the reporter stays outside.
- Locate the crisis team leader immediately, and if a different person, the spokesperson.
- Escort the reporter to the conference room or other holding area.

LOGISTICS: ORGANIZING A MEDIA INFORMATION CENTER

In a severe emergency, or when a situation draws intense media scrutiny, you may want to set up a media information center to ease communication and manage your message.

The following should be available in the media information center during emergencies or situations that draw intense interest:

- Telephone lines for outgoing calls
- Two cellular phones (in case of power problem)
- Word processor, paper and white-out
- FAX machine
- Photocopying machine
- General media information kit about the school
- Copies of the news release pertaining to the crisis
- Large map of site for briefing
- Smaller, individual maps of the site for media
- Poster board, black markers, duct tape and scissors
- Radio(s)
- Television(s)
- VCR
- Radios (walkie-talkies)
- Pagers for key personnel
- Notepads, pens and stapler
- Coffee-other refreshments
- Ashtrays
- Administrative assistance
- Small generator in case of power failure

THE AFTERMATH OF A CRISIS: PITFALLS AND OPPORTUNITIES

While the initial burst of activity may subside over the course of hours or days, the aftermath of a crisis can be a dangerous time. It's easy to sigh with relief that the worst is over. Don't fall prey to this temptation; sustain the momentum of interest and use it as a chance to get out positive messages and stories if you can. For example, think about visiting editorial boards, taking out an advertisement in the newspaper, showcasing letters from third-party supporters, reaffirming the schools commitment to quality, safety and performance, and so on.

Keep in mind, too, that separate from the crisis you have just been through, the school may have upcoming plans that will be affected. Reassess your public relations and community relations efforts to make sure they "fit" given what's just happened.

Finally, you may want to plan substantive activities that will help to reestablish your school administration's reputation and leadership in the community
